DEFINITION OF LEARNING

Learning in an exceptional school takes place in a joyful, safe and caring environment. It is a carefully engineered journey where teachers challenge their students with rich experiences to reach deep understanding using inquiry and critical thinking. Students are encouraged to meet their full potential and develop the skills to be successful in a rapidly changing world.

sucessThey are led to become self-directed, independent thinkers, capable of teamwork and problem solving in their immediate and global environment. Learning is a personal life-long process of acquiring, developing and consolidating knowledge, skills and understanding. Learners engage with and reflect upon information and experiences to construct new, or modify existing, understanding, as well as develop and apply personal, social, physical and academic skills and qualities.

LEARNING WITH TECHNOLOGY

sucessGenius International school believes that technology has, and will continue to have, a major impact on our students' lives. The technology integration program at GIS strives to define meaningful learning with technology as well as to help develop and support teaching staff.

CONNECTING

Students use technology to collaborate with others rather than working individually at all times. Students use technology to make connections between new and existing knowledge, skills and understanding.
