

MESSAGE BY PRINCIPAL - MR. ANTHONY F. D'SILVA

Throughout its 160 years St. Patrick's has always catered not only to our students' academic progress but more importantly to their character and personality building. The premise of caring for our fellowman has been at the core of all our teachings and the grooming of our students into compassionate and considerate young persons. More recently, we are now trying to bring this great flagship up to par with the latest technologies and innovations; so that in years to come our students will have every facility at their disposal to hone their skills by equipping them with 21st century know-how. This is our present focus; and coming on board to assist with this huge undertaking is our alumni of yesteryears who have already shown goodwill to their alma mater. This website is hoped to bring our students, their parents, the staff and our alumni together as one strong Patrician family and may it be the harbinger of the rise to greater glory of our dear St. Patrick's High! Per aspera ad astra!

ABOUT US

OUR VISION

As a school of the Catholic Board of Education Karachi, St. Patrick's High School aspires to be:

An authentic Catholic Educational Community that celebrates and reflects 'acting justly, loving tenderly and walking humbly with God' (Micah 6:8). A dynamic educational community for boys, young men and young women that maximises their potential to be both active contributors to and visionary voices within an ever-changing society. An inclusive community, which continuously seeks to create and renew respectful, compassionate relationships by which all can experience what it means to be fully human.

OUR MISSION

St. Patrick's High School has strong learning and academic traditions where every student is encouraged to take responsibility for their own learning in an environment that values knowledge, excellence, scholarship and innovation. It does this through:

Fostering personal worth and belonging, tolerance, compassion and generosity. Educating boys, young women and young men holistically in spiritual, moral, intellectual, emotional, physical, cultural and social dimensions of life. Providing a safe and sustainable environment in which St. Patrick's students can learn and live. Providing a curriculum that is challenging and develops the core competencies of the 21st century learners such as collaboration, digital literacy, critical thinking and problem-solving using appropriate technology and engaging methodologies informed by good pedagogy. Fostering a personal responsibility for learning as a lifetime's work. Recognising the family as the primary educators of our students and collaborate with parents for the development of their sons and daughters.
