

Welcome to Beaconhouse

The Beaconhouse School System has risen from its modest beginnings in 1975 as Les Angles Montessori Academy to become a major force in the education world. With an ever-expanding base, already established in the UK, Malaysia, the Philippines, Pakistan, the UAE, Oman, Belgium and Thailand, Beaconhouse is one of the largest private school networks in the world

---

#### Mission

Beaconhouse aims to provide quality education of an international standard. We aim for excellence through quality management, quality training and quality teaching, bringing benefits to our students, the community and the wider world.

---

#### Vision

Beaconhouse values its heritage while it continues to reinvent its educational approach to meet the needs of the future. We believe that modern methods and attitudes can enable students to achieve their fullest potential.

With the world and the needs of the community changing at an ever-increasing rate, Beaconhouse endeavours to be open to change, to adapt, innovate and keep pace with the goals that society expects. At Beaconhouse, our aim and belief is that through effort and hard work, students will be able to step confidently into the highly competitive "real world". We ensure that they are equipped with the ability to make mature and well-informed judgements based on a clear understanding of essential principles, concepts and moral values. This, we believe, is the best contribution we can make towards their development as productive members of society and, through them, to the country and the wider world.

Library Learning Resource Centre

The Library Learning Resource Centre is considered the hub of learning at school.

All technologies used at school are displayed & used by students individually, collaboratively & in groups for discussions and for assignments and allocated tasks.

Students engage in self-learning activities, in groups or under supervision as you will note in the exhibit, and are provided multiple resources they can choose from. Students might be assigned to research, read, write a story, plan a project to build robots, Skype to conference or collaborate, use a model, or play a game to relax.

Every student is free to choose what & how he wishes to learn when in the LLRC.

## SPORTS

As part of its effort to provide an all-round education, TNS places a particular focus on offering a complete sports programme for all of its pupils. This programme is designed to meet the needs of all of our age groups. It is compulsory for all pupils from Nursery to Year 12 to take part in weekly physical education and swimming lessons.

For our youngest learners, sports lessons involve building confidence, coordination and simple skills including running and jumping games and basic agility exercises. Gymnastics equipment including a tumble track is also in place along with a balance beams and other equipment.

For older students the program focuses on organised individual and team sports. TNS is aware that physical activity is a key component of the IB philosophy at all levels and as a result of this the school encourages all of its students to be enthusiastic participants and try out new skills as part of an effort to develop a healthy life-style and promote team spirit. The school encourages chess as an activity which can help develop thinking skills and promote disciplined intellectual focus. This is an area in which many children lack at this age as the electronic media and computer screens occupy most of their time. Before and after school clubs are offered for students of all ages in soccer, cricket, gymnastics, chess, volleyball, and other sports. Specialised coaches run the swimming program throughout the year with heated pools in winter. TNS has access to the Beaconhouse Sports Complex for weekend league competition/practices and a riding school at Bedian Road.

Teams from TNS have been participating in more and more inter-school contests over the last year. They have taken part in cricket, swimming, chess, athletics, volleyball, dodgeball, tug of war and other competitions against other schools. Competitions within the school have also been held regularly and have included the annual TNS Little

Mastersâ€™™ chess championships, swimming galas for boys and girls, sports days for Early and Primary years and an athletics championship for seniors.

TNS Beaconhouse believes sports is an important element of the holistic learning and also includes Physical and Health Education in its MYP curriculum, making it available as a subject for those who wish to take it up. TNS schools have every intention of expanding its sports program year by year until we offer truly defined sports/physical skills acquisition environment.

Sports offered at TNS

Swimming  
Gymnastics  
Athletics  
Cricket  
Soccer  
Badminton  
Table tennis  
Taekwondo  
Rugby
